

Site Specific Consulting Tools

GK Technology is a full service precision farming company. We enable you to do as much, or as little, of the work as you need to fit your business. We pride ourselves on being one of the few, true full service technical providers in site-specific agriculture.

GK Technology can do everything for you from start to finish. Or, if you

prefer, we will provide you the software and training to do it yourself. In all programs, you maintain ownership of the data. We have created three options to fit your needs.

- **Mapping Center**
- **Software Sales**
- **Consultant Package**

Mapping Center

This program is start to finish, full service mapping. It is tailored to users who don't want to or don't have time do mapping themselves. You provide the field info, we create the zones, and you sample those zones. Then we use those results to create prescription maps and e-mail them to the applicator.

You Provide

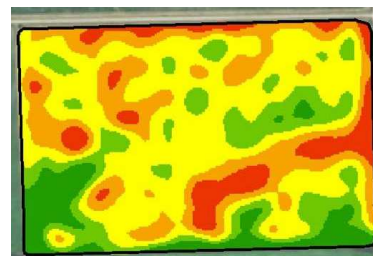

- Field location & relevant history
- Yield, topography & Veris (optional)
- Zone confirmation of Maps
- Application rates and/or soil tests

GK Provides

- Process yield or imagery data
- Create field management zones
- Customer zone confirmation
- E-mail zones to soil sampler
- Apply input application rates
- Prescription seed & fertilizer maps
- E-mail prescription files

Pricing

- \$1.50/ac—Zone Creation*
- \$1.25/ac—1st Prescription Creation*
+ \$0.50/ac—Additional Product*
- \$1.50/ac—Seed Maps*
- \$1.50/ac—Yield Data Processing
- \$1.50/ac—Topography Processing
- \$600/section—LIDAR Processing
- \$150/hour—Tile Consulting

* GK Technology recommends zone soil sampling for VR (variable rate) applications of fertilizers and lime. We recommend yield mapping prior to VR seeding. GK Technology does not provide soil sampling services, product application or seeding services, and these costs are not included in any of our pricing. We will assist you in finding equipment and service providers if requested. VR mapping will be turned around in 48 to 72 hours.

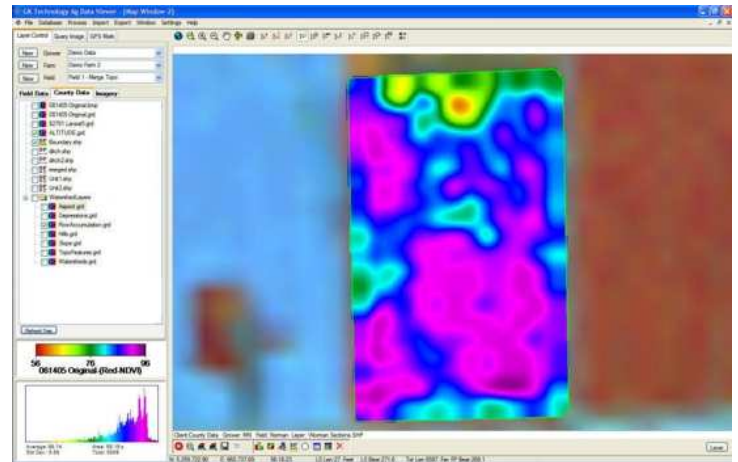

Software Sales

This program is tailored to users that are comfortable with their software abilities and wish to control more of the process themselves. For users at this level, GK serves as a software support company and also offers training classes. These users can produce customized zones, write prescriptions to fit their needs and create drainage & tile maps. Software is sold in modules to fit everyone's needs.

Software Pricing

- \$440—*General GPS Unlock
- \$1,800—*Nutrient Unlock
- \$2,200—*Watershed / Drainage
- \$1,200—*Veris Logging
- \$1,200—*Variable Rate Controller
- \$2,500/yr/user—Consultant Package

*Sold on a "per user" basis with a 10% annual update & support fee

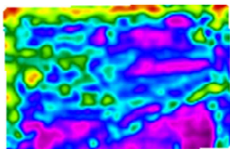

Consultant Package

The Consultant Package is a premium package designed to give you functions to process satellite data faster and produce a premium product to show up the competition. Other software unlocks and update fees are NOT included.

- **Online Imagery Data**—you don't have to download another Satellite image to use it. Just create your boundary, and click through our extensive online library of data. (Landsat, Sentinel, NAIP, LiDAR and DEM data)
- **Confidence Mapping**—a premium map creation system allowing you to merge together a mix of three yield and/or image maps. In return, you get an "Average Productivity", "Maximum Productivity" and a "Confidence Map". The Confidence map shows you how confident you are a given area will produce as it has in the past, allowing you to make more educated decisions.

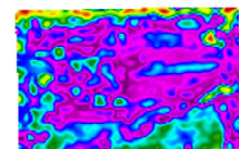

Average Productivity

Buffered Max Productivity

Confidence

- **Classroom Training**—All Classroom training is included.
- **Consultants Mapping**—You gain access to premium mapping services. When you get too busy, just hand data off to GK. Ask about Consultant Pricing.
