

Innovative Technological Solutions for Agriculture's Challenges

Consultant Package

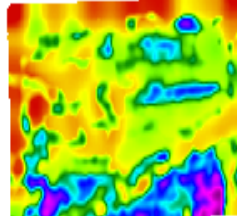

The Consultant Package is a premium package designed to give you functions to process satellite data faster and produce a premium product to show up the competition. Software unlocks and update fees must be purchased separately.

- **Online Imagery Data**—you don't have to download another Satellite image to use it. Just create your boundary, and click through our extensive online library of data. (Landsat, Sentinel, NAIP, LiDAR and DEM data)
- **Confidence Mapping**—a premium map creation system allowing you to merge together a mix of three yield and/or image maps. In return, you get an "Average Productivity", "Maximum Productivity" and a "Confidence Map". The Confidence map shows you how confident you are a given area will produce as it has in the past, allowing you to make more educated decisions.

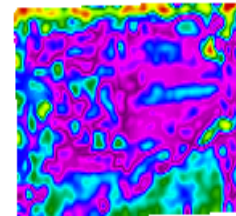

Average Productivity

Buffered Max Productivity

Confidence

- **Consultants Mapping**—You gain access to premium mapping services. When you get too busy, just hand data off to GK. Ask about Consultant Pricing.*
- **Multiple Output Scripts** - All Product maps output in a single run
- **Quick Math Scripts** - One click to run and save
- **Classroom Training**—All Classroom training is included at no cost.
- **Consultants Meeting**—Additional meeting at no cost. Covering ADMS updates, consultants tools and user topics.

* GK Technology recommends zone soil sampling for VR (variable rate) applications of fertilizers and lime. We recommend yield mapping prior to VR seeding. GK Technology does not provide soil sampling services, product application or seeding services, and these costs are not included in any of our pricing. We will assist you in finding equipment and service providers if requested. VR mapping will be turned around in 48 to 72 hours.

Software Sales

ADMS is tailored to users that are comfortable with their software abilities and wish to control more of the variable rate process themselves. For users at this level, GK serves as a software support company and offers many training options. Users can produce customized zones and grids, write prescriptions to fit their needs and create drainage & tile maps. Software is sold in modules to fit your needs.

Software Pricing

- \$120—General Unlock
- \$680—Variable Rate Create
- \$680—Topography / Watershed
- \$800—Surface Shaping
- \$2,500—Consultant Package

All ADMS software is sold as separate modules and billed on annual basis.

Mapping Pricing

	Standard/Grower	Consultant
Zone Creation		
Standard Method	\$2.00/ac	\$80/field
Confidence Mapping	\$2.50/ac	\$100/field
Grid Sample Maps		
Grid Results	\$50/field	\$30/field
with Yield Goals	\$2.00/ac	\$80/field
Rx - Prescriptions		
First Product	\$1.25/ac	\$55/field
Additional Product	\$0.50/ac	\$10 /field
Topography		
LiDAR only	\$1.50/ac	\$80/field
RTK	\$1.50/ac	\$80/field
Tile Planning	\$150/hour	\$100/hour
Yield		
Yield Processing	\$1.50/ac	\$80/field
Hourly Mapping		
Special Projects	\$150/hour	\$100/hour
Data Pricing		
County Data / county	\$200	\$100
Lidar Data / county	\$200	\$100
