

ADMS 2025

Data Merging~Mod~Zones

This training session goes through different ways to merge and modify data to create the accurate zones.

- 1) Creating Zones- How to look at the field – Use NAIP – and LiDAR
- 2) How to prep the layers
- 3) How to put the layers together
 - a. Average of all layers – pg 132, pg 128-130
 - i. Correlation Matrix -
 - ii. Quick Zones – pg 133
 - iii. Confirming Zones
 - b. Confidence Mapping
 - c. Principal Component Analysis – pg 123
 - d. Other Data/ Zone Idea – Topo Features, Veris, etc.
- 4) Manual Zone Creation – pg 134
- 5) Create Contour Polygons – pg 136 - 137
- 6) Mod Area Creation – pg 136 – 137
- 7) Other Data –
 - a. Lidar
 - b. Topo Features – pg 111
 - c. Veris Data
