

ADMS Software

Site-specific ag software for creating Zones, Grids, Prescriptions, go Soil Sampling, Watershed Modeling, Tile Design and Land Shaping. Implement your creative agronomy and drainage in the field.

Zone - Grid - RxMaps

★ Zones

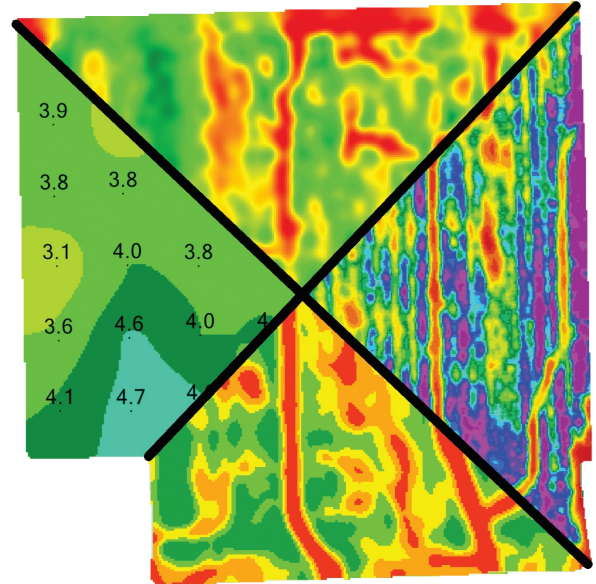

- Merge multiple data sets to create zones
- Easily modify zones maps for soil sampling

★ Grids

- Create grids, custom grids, sample points
- Write nutrient layers
- Produce yield goals or production metrics

★ Prescriptions

- Scripts based off nutrient layers & yield
- RxMaps using manual entry of rates
- Maps export to most controllers

Watershed Modeling

★ Create DEM (Digital Elevation Model)

- Using RTK topography data
- Processing LIDAR elevation

★ Create Profiles - Ditches & Tile

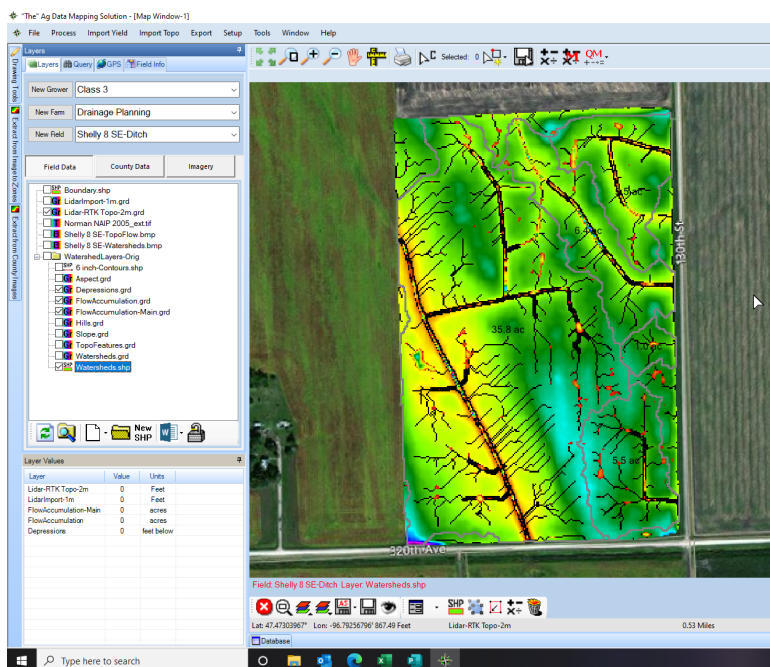

- Assistance in planning ditches
- Helps in designing tile plans

★ Watershed Modeling

- Useful for drainage planning
- Shows water flow across fields
- Field depressions

★ Land Shaping

- Redesign field shape and flow
- Cut / Fill and re-slope fields

Ag Data Mapping Solution Software Pricing

- General: \$150 / Year**

 - Base Module - Required to run all modules.

Enables basic Shapefile to raster conversions tools, GPS functions for sampling & data collection, also tools for laying out grid points.
- Variable Rate Create: \$750 / Year**

 - Processing Tools Imagery, Yield, Topography, Soils and EC data. Create Zone & Grid maps for sampling, soil results maps & VR application maps. Maps export to common controllers.
- Topography/Watershed: \$750 / Year**

 - Create DEM's, watershed areas, flow accumulations, hills, depressions, slope, aspect and contours. Tools to layout and plan ditches & tile, showing side profile, grade, cut/fill & depths.
- Surface Shaping: \$2,000 / Year**

 - Package requires Topo/Watershed Unlock.

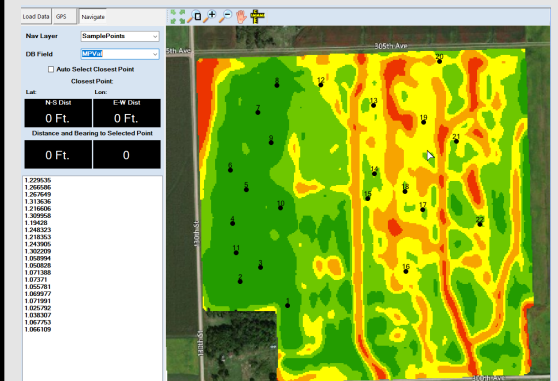

Using DEM's to re-shape your field. Tools here are designed to cut, fill & balance soil movement. Moving minimum amounts of soil to achieve the perfect design and grade.
- Drainage Consultant Pkg: \$1,050/Year**

 - Access to LiDAR and NAIP only. This package does not include Sentinel or Landsat Data or free admission to training classes. Purchase of this package does NOT include any other packages.
- Consultant Package: \$2,600 / Year**

 - Access to GK's online data, LiDAR, NAIP, confidence mapping, faster processing tools, consultant mapping services and free admission to all training classes. Purchase of this package does NOT include any other packages.
- Multi-Package Pricing** - Purchasing both Variable Rate Create and Topo/Watershed, get the second package at half price.

- All ADMS software—sold as separate modules.
- The "General" package must be purchased and enabled for any other package to function.
- Prices are subject to change. Confirm with GK Staff.

Multiple input Zones - Imagery, Yield, Veris, Soils & Topography. GPS - Sample Point Navigation.

Surface & Tile Drainage planning, showing Profile and statistics.

Interpolated Variable Rate maps, exports to common controllers.
